# VIBE 2026 College Fest Website

HTML and CSS Website Report

## 1. Aim

To design and develop a responsive VIBE 2026 College Fest Website using HTML and CSS to display technical events, cultural competitions, workshops, event schedules, coordinators, festival rules, and a student registration form.

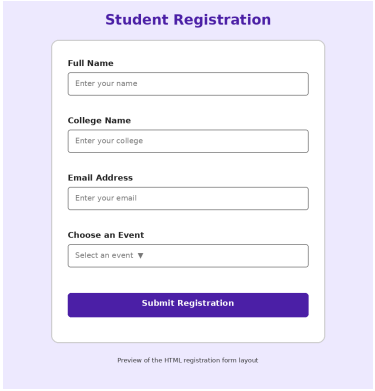

## 2. Procedure

1. Create a basic HTML document using the DOCTYPE, html, head, and body elements.
2. Add a header titled VIBE 2026 and navigation links for Home, Events, Schedule, Coordinators, Rules, and Register.
3. Create a welcome banner with a short festival description and a Register Now link.
4. Design separate cards for technical events, cultural events, and workshops using HTML and CSS.
5. Create event schedule and coordinators tables, and display festival rules using an ordered list.
6. Create a student registration form with fields for full name, college name, email address, and event selection.
7. Style the website with background colors, gradients, spacing, borders, rounded corners, and box shadows.
8. Use a CSS media query to improve the layout on mobile devices, then open the HTML file in a browser.

## 3. Output

*Website output preview*

*Student registration form preview*

## Result

The VIBE 2026 College Fest Website was designed using HTML and CSS. It presents festival information in an organized, user-friendly layout and includes a student registration form.

# Sweet Crumbs Bakery Website

HTML and CSS Website Report

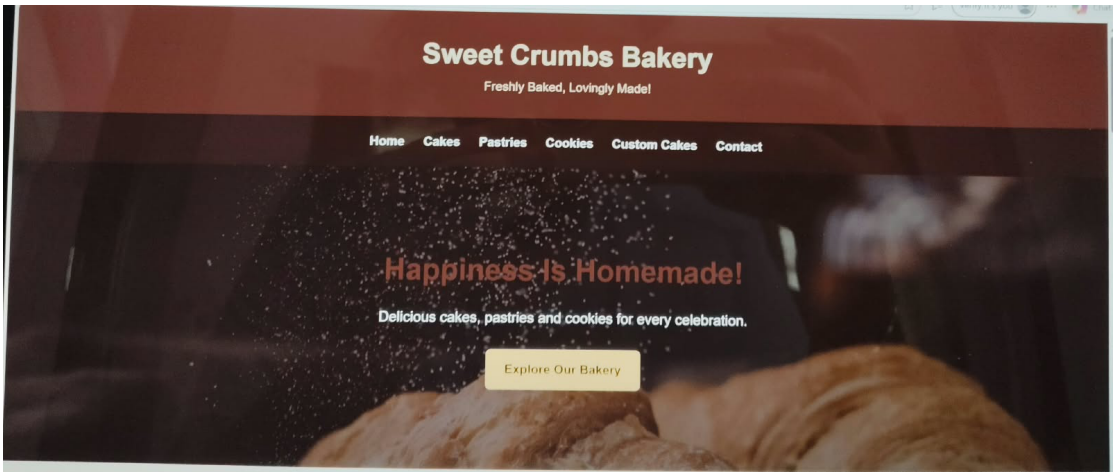

## 1. Aim

To design and develop a responsive Sweet Crumbs Bakery Website using HTML and CSS to display cakes, pastries, cookies, custom cake designs, seasonal offers, an online order form, and bakery contact information.

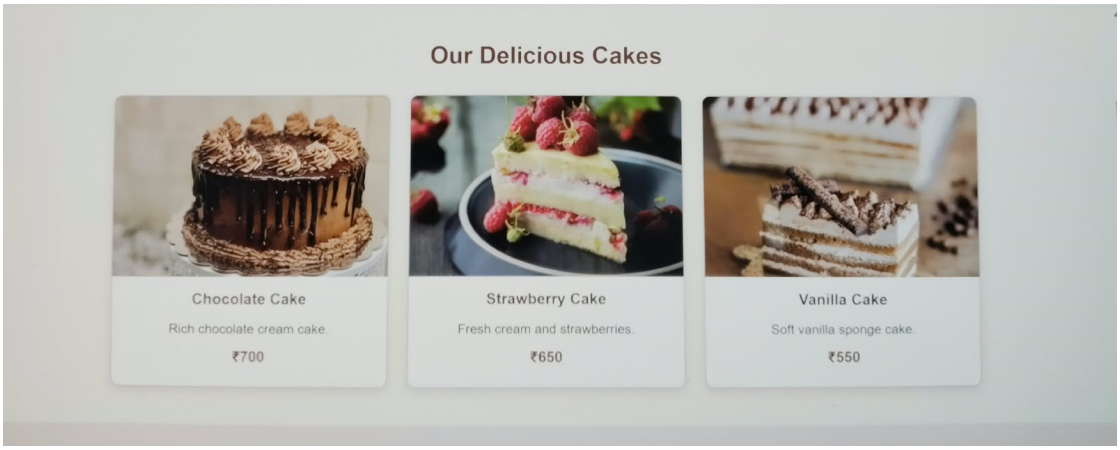

## 2. Procedure

1. Create the basic HTML structure using the DOCTYPE, html, head, and body elements.
2. Add the bakery name, tagline, and navigation links for Home, Cakes, Pastries, Cookies, Custom Cakes, and Contact.
3. Design a welcome banner and product galleries for cakes, pastries, and cookies with images, names, descriptions, and prices.
4. Add a seasonal offer section advertising 15% off selected cakes and custom cake options for birthdays, weddings, and themed celebrations.
5. Create an online order form with customer name, phone number, product, quantity, delivery address, delivery date, and special instructions.
6. Add the bakery address, phone number, email address, and opening hours.
7. Style the webpage with CSS colors, spacing, borders, rounded corners, shadows, hover effects, and responsive media queries.

## 3. Output

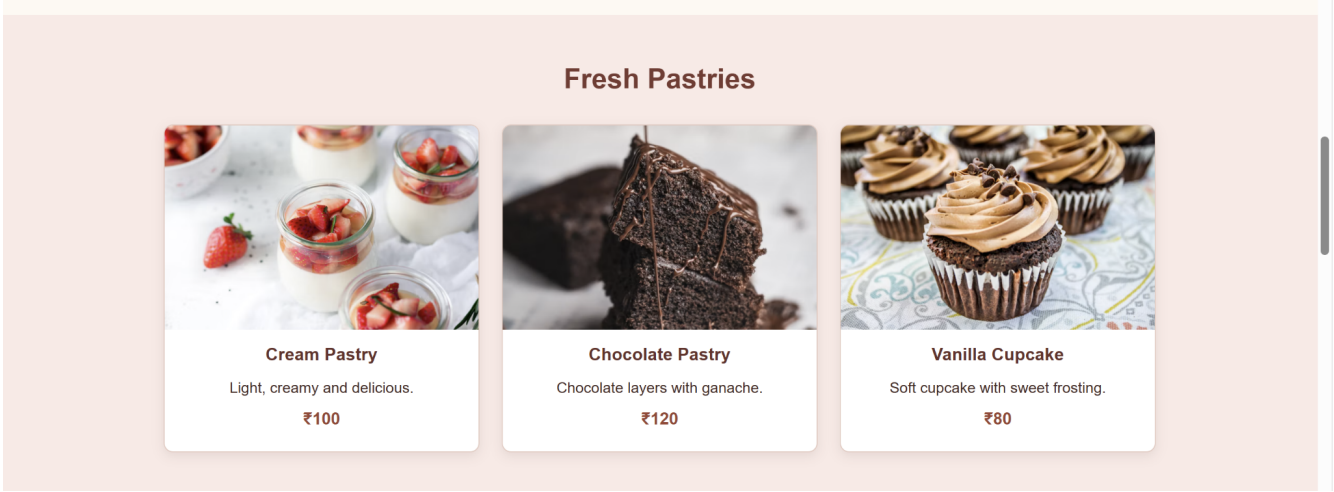

*Output Image 1: Bakery homepage and navigation*

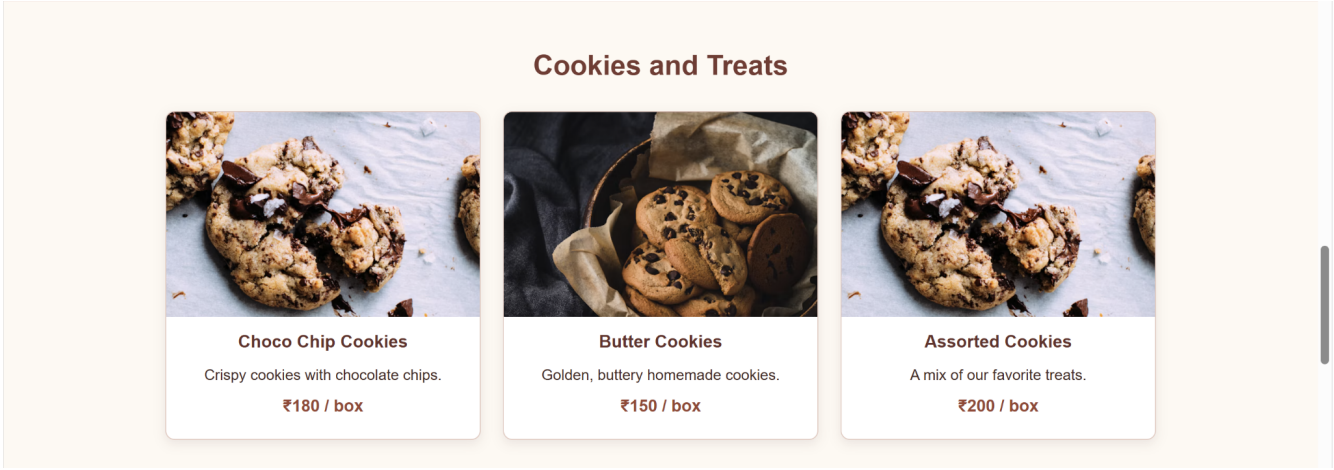

*Output Image 2: Cakes gallery*

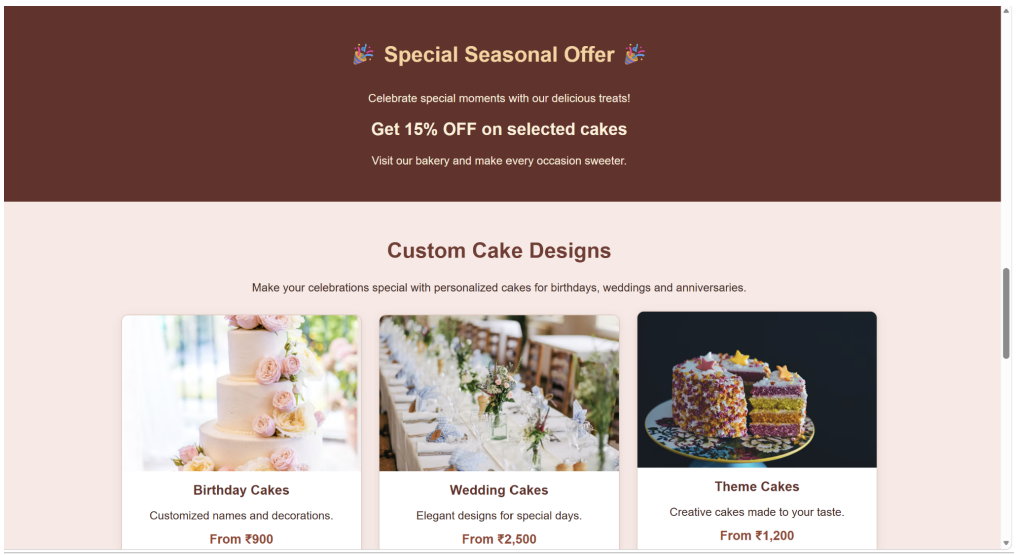

## 3. Output

*Output: Fresh pastries section*

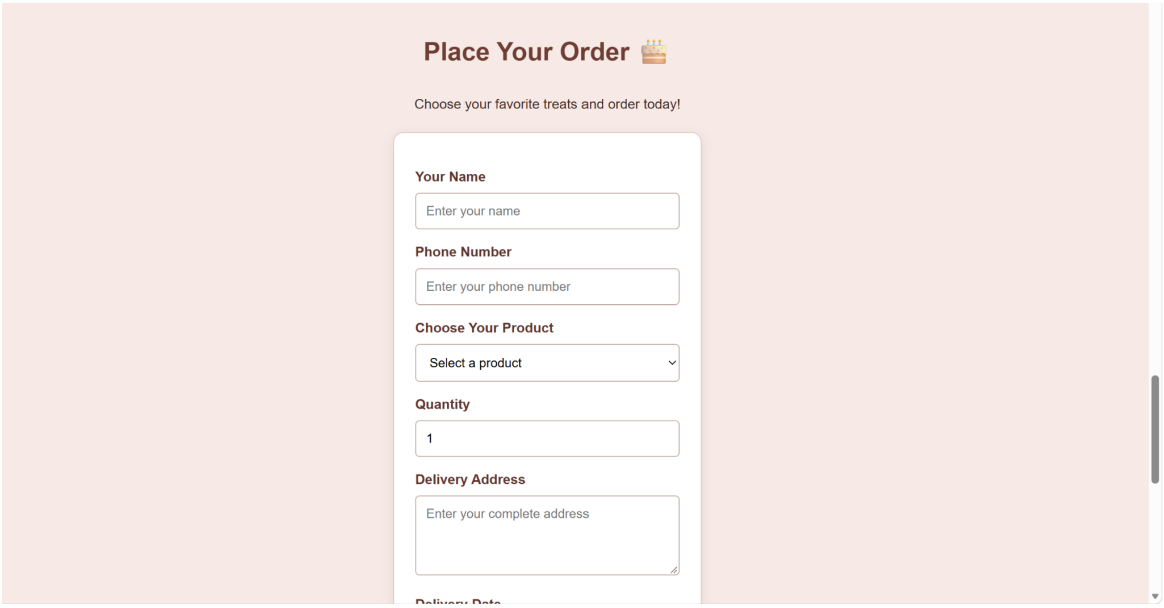

*Output: Cookies and treats section*

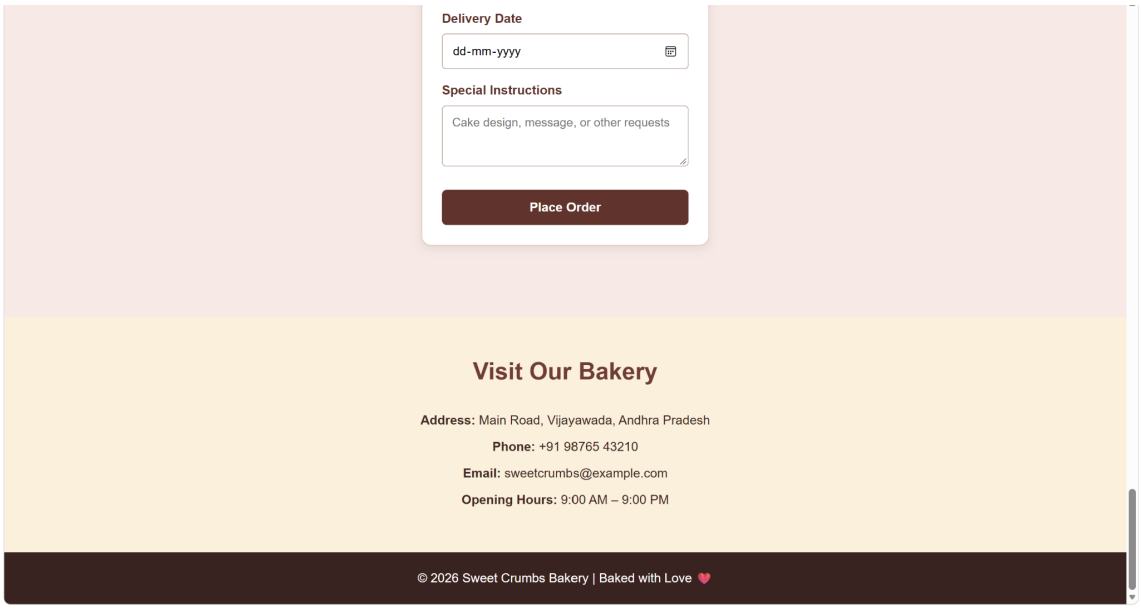

*Output: Seasonal offer and custom cake designs*

## 3. Output

*Output: Online order form*

*Output: Order form continuation and bakery contact details*

## Result

The Sweet Crumbs Bakery Website was designed using HTML and CSS. It presents bakery products and prices, special offers, custom cake options, an online order form, and contact details in a clear layout. The supplied screenshots document the website output.

# CarePlus Hospital Website

HTML and CSS Website Report

## 1. Aim

To design and develop a hospital website using HTML and CSS that presents hospital information, doctor profiles, consultation timings, available appointment slots, a patient registration form, and contact details in a clear and user-friendly layout.

## 2. Procedure

1. Create the basic HTML document structure with the head and body sections.
2. Add the CarePlus Hospital title, tagline, and navigation links for Home, Doctors, Timings, Appointments, Patient Registration, and Contact.
3. Design a welcome section with a healthcare message and a Book an Appointment button.
4. Create doctor profile cards displaying each doctor's name, specialization, experience, consultation fee, and appointment button.
5. Add a consultation timings table and an available appointment slots table.
6. Build a patient registration and appointment form with fields for name, age, gender, phone number, email, doctor, appointment date, preferred time, and reason for visit.
7. Add a contact section containing the hospital address, phone number, email address, and hospital hours.
8. Use CSS to style the navigation bar, colors, cards, tables, buttons, form fields, and page sections, then review the webpage in a browser.

## 3. Output

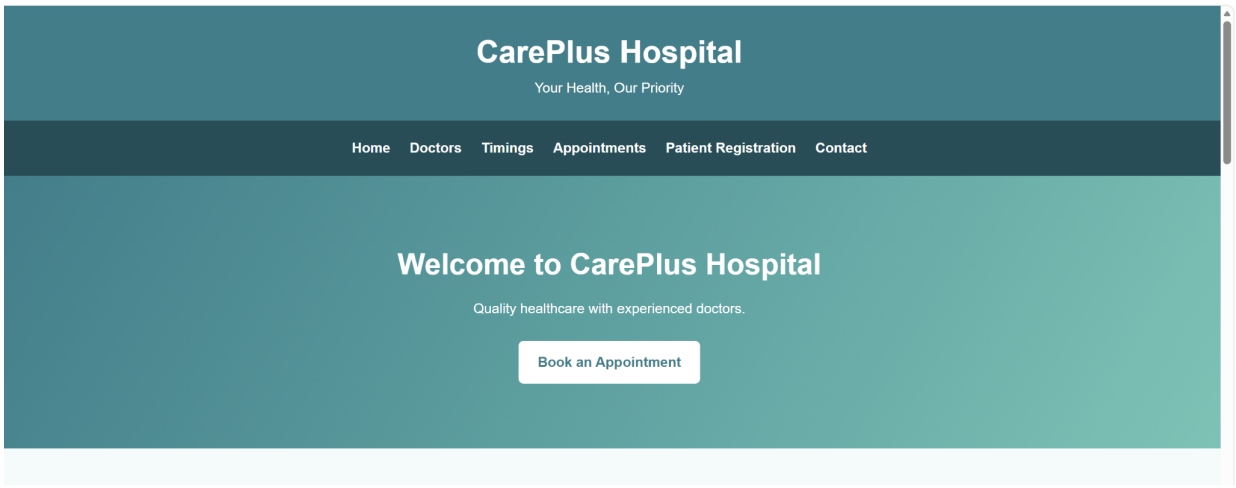

*Figure: CarePlus Hospital homepage and navigation*

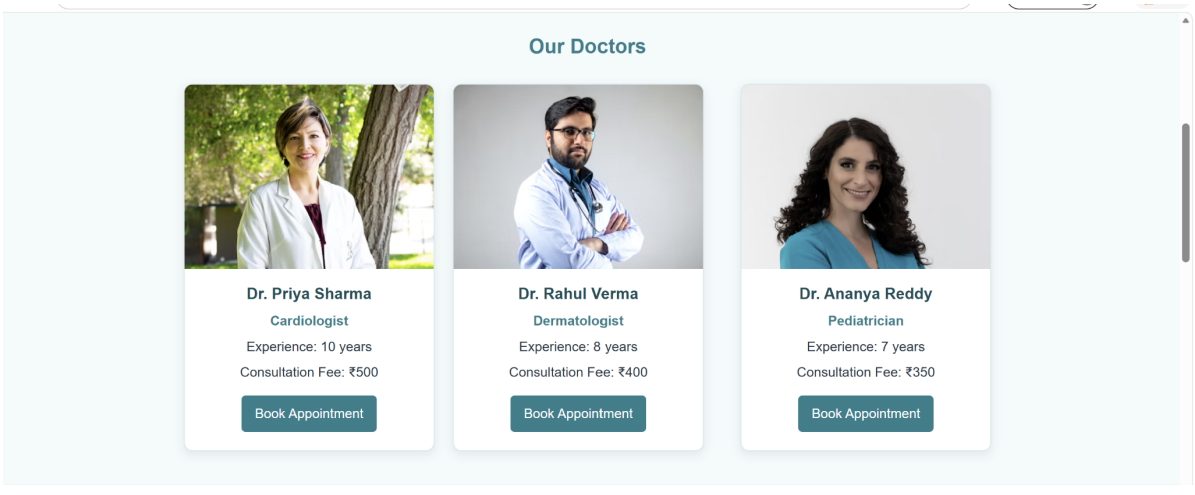

*Figure: Doctor profiles and consultation details*

# 3. Output

Consultation Timings

| Doctor | Specialization | Days | Timings |
|---|---|---|---|
| Dr. Priya Sharma | Cardiology | Mon - Fri | 9 AM - 12 PM |
| Dr. Rahul Verma | Dermatology | Mon - Sat | 2 PM - 5 PM |
| Dr. Ananya Reddy | Pediatrics | Tue - Sun | 10 AM - 1 PM |

Available Appointment Slots

| Doctor | Date | Available Slot | Status |
|---|---|---|---|
| Dr. Priya Sharma | 25 Oct 2026 | 10:00 AM | Available |
| Dr. Priya Sharma | 25 Oct 2026 | 11:00 AM | Available |
| Dr. Rahul Verma | 25 Oct 2026 | 3:00 PM | Available |
| Dr. Ananya Reddy | 26 Oct 2026 | 11:00 AM | Available |

*Figure: Consultation timings and available appointment slots*

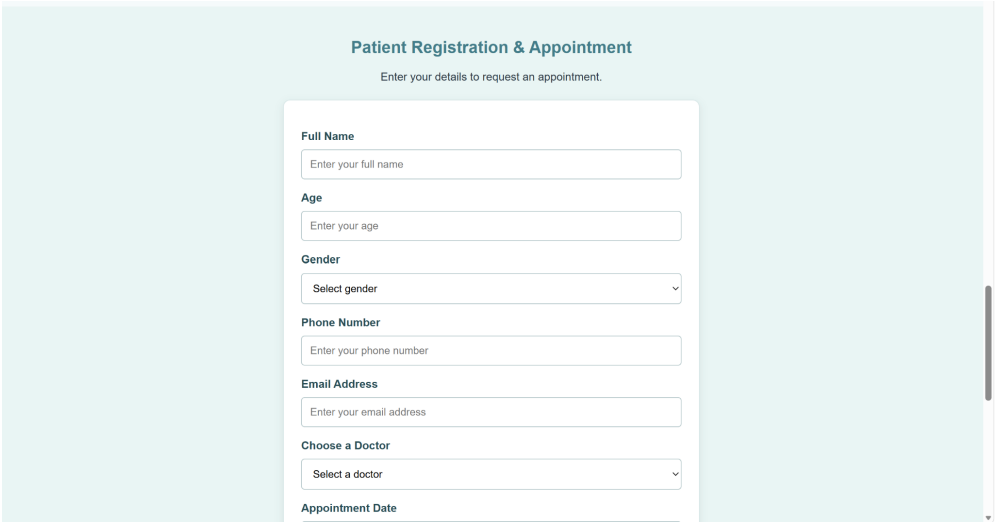

*Figure: Patient registration form*

## 3. Output

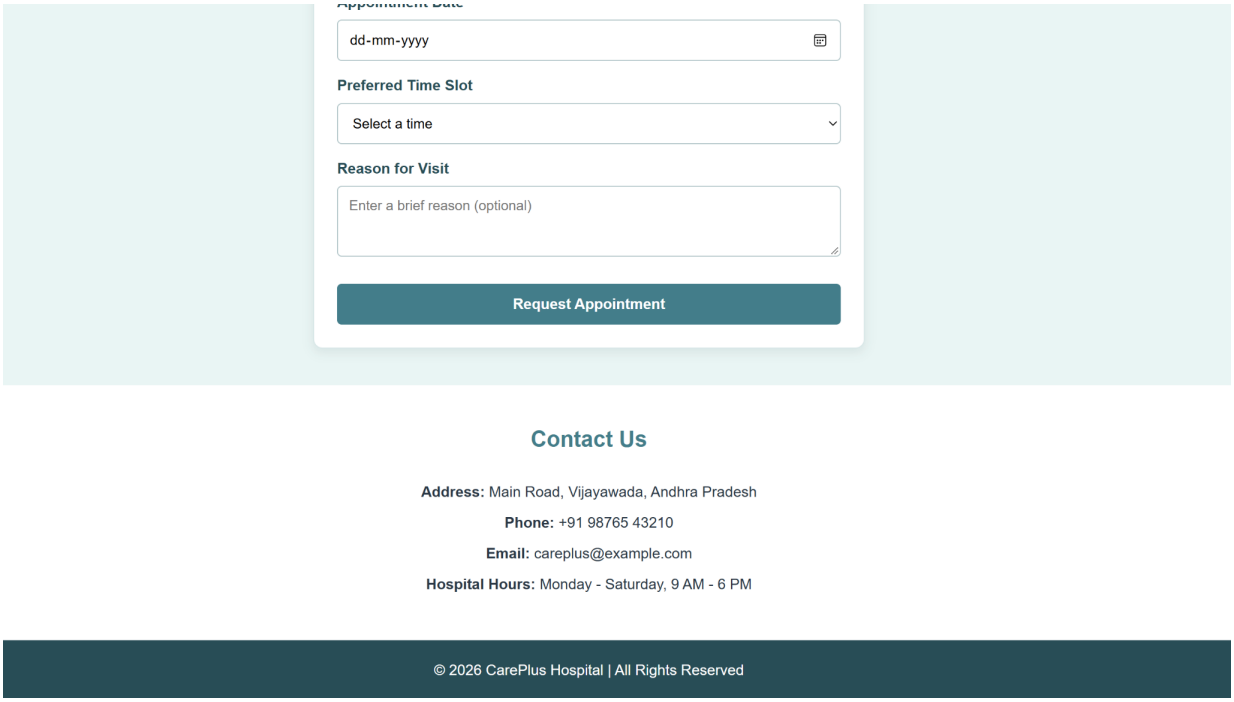

*Figure: Appointment request form and hospital contact details*

## Result

The CarePlus Hospital website was designed with sections for the hospital introduction, doctor profiles, consultation schedules, appointment availability, patient registration, and contact information. The website organizes the information clearly and provides a form through which visitors can request an appointment.
